
Appendix C: Additional Printer Commands

Call Accounting includes a separate initialization file entitled 'MATCA.INI' which provides your PC with initialization parameters used by the system. The following is a list of command parameters in the MATCA.INI file which you can update to change your printer setup.

Note: Improper editing of these command parameters may create errors in your configuration. Only users should attempt to modify this file.

Table C-1
Printer commands

Command	Description
Printer=	Sets out default printer
Font_80=	80 character font
Font_130=	132 character font
